A brief description of the dataset your application will use. This description should include link(s) to where the data comes from, licensing information that makes it clear you're allowed to use the data for academic purposes, and information about how you will actually get your hands on the data (maybe there's a simple download of a csv/xls/txt file, but maybe there's not...).

Link to download data, as well as usage license (public): https://catalog.data.gov/dataset/college-scorecard

Access & Use Information

🌐 **Public:** This dataset is intended for public access and use.
📄 **License:** Creative Commons CCZero

The data is available as .csv files.

A list of features you want your web application to include, ordered from most important to least important.

1. Search Criteria
    a. Individual Searches
    b. In Combination
    c. Clear/New Search
    d. Include Ranges
    e. Multiple Options under each criteria
2. Individual College Information
3. Navigation
4. Remove result: A "I don't want this" Search
5. Help/About
6. Quick facts
7. Comparison of results
8. Matching Quiz
9. History Data (in a graphical representations)
10. Search History

User Experience: Accessibility, Headers, Buttons that are large enough to click, drop down menus

Mockups of the rough appearance of your web application performing three or four of its most important features. Use balsamiq, and export those images for inclusion in your PDF report. You and your partner(s) will receive an invitation to join balsamiq. NOTE: all students in the class will share one balsamiq project, so it will be important to name your mockups carefully. Please name your mockups using your partnership's email addresses separated by underscores, like "jondich_arafferty #01 homepage", "jondich_arafferty #02 credits page", etc.
**Mockups:**
